

## Additional Applications

# Strut Tower Bar

- 50mm wide, 15mm thick hollow aluminum construction is utilized for a light weight but rigid Strut Tower Bar.
- By reducing the distortion of the body during cornering and braking, the suspension's full capability can be brought out to improve the vehicle's maneuverability.
- After the shaft has been blasted, it has been treated with a scratch resistant special black coating. Along with the high quality finish, the 50mm wide shaft has a strong presence in the engine room.
- The BLITZ logo has been laser inscribed for high durability and quality.
- The Brackets has been designed with BLITZ's acquired knowledge to maximize rigidity for each specific vehicle. Furthermore, red metallic paint has been applied to dress up the engine room.

Product Number: 96114 KF5P Front
