Height Adjustment	Torsion bar	Low Down Block
Ride Height Adjustability mm	-	-40
Remarks	Low Down Block and Bump Stop are included.	

※Front ride height is adjusted by the torsion bar.

■Precautions During Installation

- Front and rear damping force adjustment dials are located inside the wheel well.
- Please make adjustments to the rear ride height by using the low down block included in the kit.

The front ride height is adjusted using the torsion bar.

※Please make sure the vehicle ride height has not changed by more than 40mm.

※Please be cautious since the vehicle ride height may be lower than the measurements listed on the vehicle inspection sheet.

■Other Remarks

- Shock absorbers, 40mm Low Down Block, Bump Stop for the front and rear are included.
- Lower your vehicle for a stylish form.
- Improve straight line stability during high speeds by increasing the damping force.
