Product Description

- Industry first Full Auto Mode is able to automatically adjust the damping force depending on how the vehicle's balance changes depending on variables such as road condition and number of passengers.
- The UP/Down switch has been enlarged and an additional rotary switch has been employed to make complex operations easier.
- The damping force can be easily adjusted from a controller inside your vehicle (Choose from 96/64/32 levels of adjustment). By utilizing a stepping motor, a maximum of 96 levels of adjustment is possible to finely tune the vehicle setup for your desired ride quality.
- During map control mode, variables such as rotational G, acceleration G, and vehicle speed are taken into account when automatically adjusting the damping force. G can be displayed in real time and its peak value can be shown as well.
- Total of 22 presets can be saved. The ADVANCED mode allows complex and detailed management of the damping force.
- With the separately sold GPS sensor kit, the vehicle speed can be easily inputted.

Product Description

- Product compatibility has been checked with the latest vehicle model
- By lowering the center of gravity, vehicle roll is minimized, and cornering performance is improved.
- Adjust the damping force depending on the number of passenger to optimize comfort.
- Decrease the damping force for increased comfort in city driving.
- Sufficient compression and rebound stroke is available to improve ride quality.
- Increase the damping force by 4-6 clicks when traveling at speed higher than 80km for a more stable ride.
